

School Day Expectations

WHAT YOU CAN EXPECT FROM US –

When you first get to Loudon you will stop at the registration booth, hand in your signed waiver forms, and get your hand stamped. You can also pick up a race program with details about the teams' cars.

Guides experienced in engineering and the automotive field will meet you at the bus and lead your group throughout the tour.

Teams will be set up with their cars in the center garages. Team members will be in front of the garages with information and are ready to talk with you, explain their car designs, and answer your questions.

There is a restaurant open at the track or you can choose to bring your own. Tables will be available to eat lunch outside. If it's raining you will eat lunch in one of the empty garages.

Expect to learn about engineering - how interesting it is to study and apply to real life challenges.

WHAT WE EXPECT FROM STUDENTS -

Listen to your teachers/chaperones and to our guides.

Stay with your assigned group during the entire event- from start to finish.

Dress according to the weather. Many events are rainy. You want to be warm and comfortable.

Respect the hard work of all of the engineering students; what you are seeing is the culmination of an entire year (or two) worth of work.

Act in a safe manner at all times. We expect that you will keep your hands to yourselves and be aware of what you touch at all times. **YOU ABSOLUTELY ARE NOT ALLOWED TO TOUCH ANY OF THE CARS AT ANY TIME.** This is important because there are electrical components on these cars that contain very high voltage, which could be lethal if touched.

Ask questions! The engineering students are excited to talk about how to build a racecar.

Have fun! Engineering students get to work on some amazing projects. Think about where you might take a career in engineering...what would YOU design to help make the world a better place?

We look forward to hosting you at Formula Hybrid School Day!
